MOBILE USABILITY TEST	P1	P2	P3	P4	P5	P6	TOTAL	POSSIBLE SOLUTIONS & NEXT STEPS
Errors - Record and prioritize most critical errors based on your error classification.		•					TOTAL	1 COORDEE COLOTIONS & NEXT OTEL C
[3] - Got confused while trying to search because she couldn't type in the prototype							2	User is used to the normal process of typing in the search bar using a mobile device, so this issue will be resolved once the app is fully functional
[2] - Tried to click on style quiz results, but they aren't buttons							1	The quiz results can be simpler, or they can be clickable so the user can start exploring designs
[2] - Tried to click on a suggested search instead of the search bar to look for minimal tattoos							2	May be resolved once the app is fully functional, but there could also be more suggestions available
[1] - Was unaware that she was taking a quiz							2	User still went through the quiz normally, she was just unaware of the purpose
[0] - Thought that names listed under the images were other people who saved the image							1	The icons can be included in the onboarding to show the difference between a user and an artist
Observations - What are people Doing, Thinking, and Feeling? Use active verbs.								
Appreciates curated content							1	_
Wanted more options in the style quiz							1	Could add more style categories into the style quiz to cover all types of tattoos
Wanted to zoom into the images							3	May not be an issue if the prototype were on a mobile device, but could also add the ability to hold down on an image in the style quiz to enlarge it and allow for 2 finger zoom on images in the rest of the app
Expected there to be tags or a caption associated with each image							1	User can add caption to an image when they upload it
							_	Album name can be highlighted if a user clicks on the "saved" button after saving an
Wanted to be able to see where an image was saved after he saved it							1	image Wording of the instructions can be simplified as there is not a big shunk of taxt.
Found the wording of the style quiz instructions to be unclear								Wording of the instructions can be simplified so there is not a big chunk of text
Was confused about the prototype automatically selecting images during the quiz							2	Will not be an issue with a fully functioning app
Used the back button to go back to the home screen								This is a function that is present in other image searching apps, so should be able to
Expected to hold down on an image to access save options							1	incorporate in Think Ink to meet users' expectations
Liked that the search bar is easy to find							1	-
Was confused about the search because she couldn't type anything							1	Will not be an issue with a fully functioning app
Expected a description of the styles during the style quiz							1	This can be incorporated with a zoom function where the user can see more information and an enlarged image by holding down the image
Confused why the quiz results were a repetition of the styles she had previously chosen							2	The quiz results can be more specific about the user's style so the wording is not repeated
Wanted artist suggestions after the style quiz							1	Can add artists suggestions to the quiz results; this will also allow the user to see what the artist icon looks like to avoid confusion later on
Liked the home screen because it looked familiar and easy to use							1	-
Expected to find the panda tattoo in an album							2	The user's profile can have subtitles that tell the user how images are separated into albums and general saved images
Was unclear to her that she was on the home page							1	The icons can change to a different color depending on where in the app a user is
Wanted to be able to filter through the images							1	Should add a filter function next to the search bar so the user can find more specific results and learn about the style options
Was confused about the distinction between artist and regular user							1	Can add artists suggestions to the quiz results; this will also allow the user to see what the artist icon looks like to avoid confusion later on
Tried to go backwards in the intro scene sequence							2	Will not be an issue with a fully functioning app; user will able to swipe back and fortl in the intro screens
Was confused about the calendar icon							3	May not be an issue once the app is fully functioning because the user will be able to click and explore this section
North Control Association and the Control Association beautiful to the Control Association and the Control Associa								
Negative Quotes - Any negative soundbytes? Record them here.								The rest of the participants didn't seem to have this issue, but with further testing if this is still an issue, the progress can be tracked with page numbers, or progress dot
"The progress dots in the style quiz make it seem there are multiple pages of options"							1	can be moved to the top of the screen
"The font is a little bland"							1	UI was not the focus of this prototype, so hopefully this won't be an issue later on
"the home page looks clunky"							1	A font change and maybe rounder edges for the images
"I'm not a huge fan of the typeface"							1	UI was not the focus of this prototype, so hopefully this won't be an issue later on
Positive Quotes - Any positive soundbytes? Record them here.								
"I like that [the quiz] is quick"							1	-
"I like that the specific styles are named"							1	-
"The icons are easy to understand"							2	-
"I don't have much experience with tattoos, so I'm glad the style quiz results define my style"							1	_
